200 Eagle Terrace Road

Fantastic Views from this Beautiful Custom Built Home

Attention to detail is obvious from the moment that you walk through the door of the Eagle Terrace home. The entryway features wall to wall slate tile flooring which extends through the hallway, bathroom, and even the storage room. The main level is extremely bright and spacious with vaulted ceilings, cherry hardwood floors and absolutely stunning mountain views from every window. The upper level features a cozy loft with custom built-in book shelves and private master suite.

The oversized double car garage is completely finished and provides more than enough space for two cars plus all of your mountain gear. With open riser fir stairs, built-in widow seats, custom metal railings, a high efficiency wood burning fireplace, and natural rundle rock masonry this home boasts a tremendous amount of craftsmanship throughout. Whether you are looking for a family home or mountain retreat this home is sure to impress.
